

EQUIVALENCIAS

Hay artículos del catálogo que son equivalentes en cuanto al número de agujas y/o grosor del hilo, pueden usarse indistintamente siguiendo la misma explicación en la revista, es importante tejer previamente una muestra de 10 x 10 cm. para adaptar el número de agujas a la muestra del punto de la prenda correspondiente y para averiguar si la tensión que da es de su agrado. Estas equivalencias son siempre orientativas, ya que dependiendo de la tensión de cada uno el punto podrá quedar más abierto o menos.

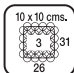

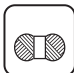

Los grupos se han hecho en base a: aproximación de grosor, aspecto del hilo y colorido similar.

ENTSPRECHUNGEN

Einige Artikel im Katalog entsprechen sich bezüglich der Nadel- bzw. der Nadelstärke; diese können ohne Unterschied für ein- und dieselbe Anleitung in der Zeitschrift benutzt werden. Es ist wichtig, vor Beginn eine 10 x 10 cm große Maschenprobe anzufertigen, um die Nadelstärke mit der Maschenprobe für das entsprechende Teil abzugleichen und um festzustellen, ob die Maschendichte Ihren Vorstellungen entspricht. Bei diesen Entsprechungen handelt es sich immer um Orientierungsdaten, da das Resultat je nach individueller Strickweise fester oder lockerer ist.

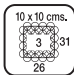

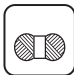

Die Gruppen sind gemäß Berechnung der Stärke sowie Aussehen und Ähnlichkeit der Färbung des Garns eingeteilt.

SOSTITUIRE I FILATI

La tabella mostra i filati tra loro intercambiabili in modo che, quando eseguite un modello, possiate sostituirne uno con un altro della stessa grossezza e lavorabile con gli stessi ferri. È importante fare sempre un campione di 10x10 cm per assicurarvi che i ferri che usate diano la tensione corretta indicata nel modello e che il risultato sia di vostro gradimento e adatto al capo da lavorare. Le misure dei ferri indicate sotto sono orientative, usate ferri delle dimensioni necessarie per ottenere la tensione corretta con la vostra mano.

I filati sono divisi in gruppi per grossezza, aspetto e colore.
